Personal Developer Portfolio

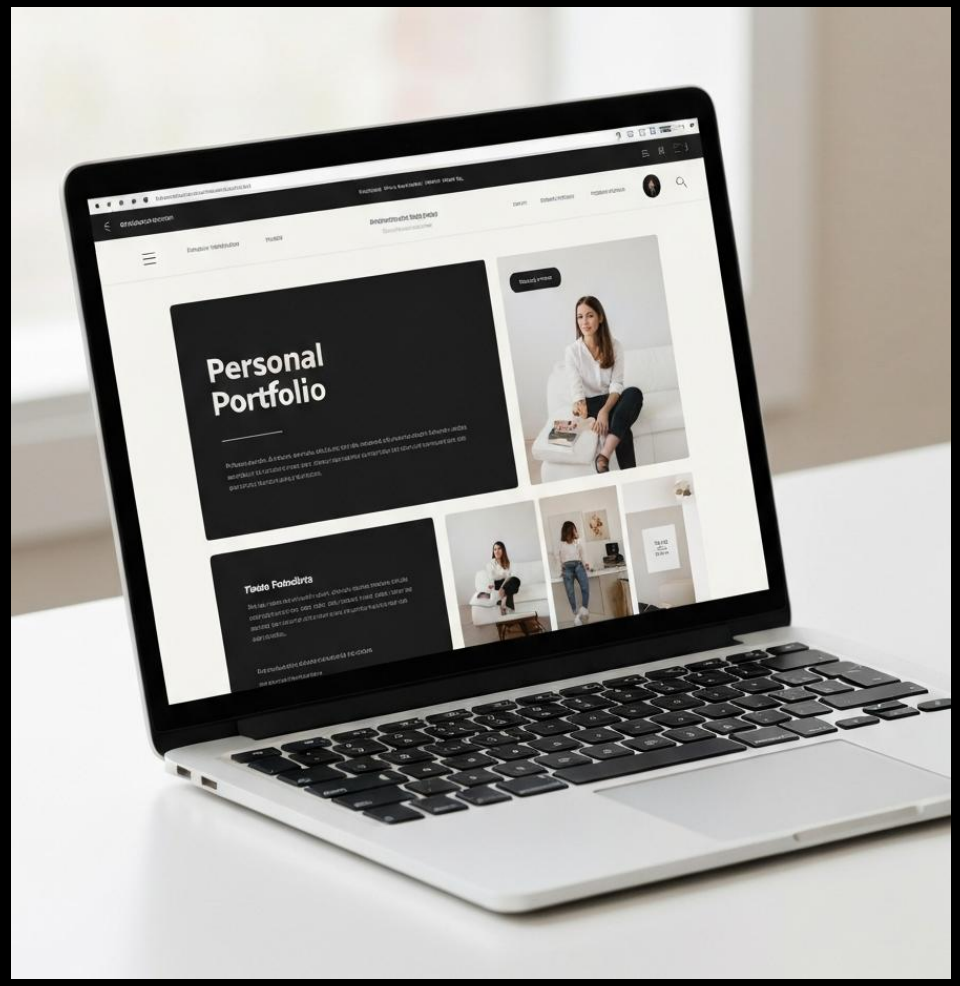
Assignment 4 – Final Web Application

Mohammed Alrashid

Student ID: 202277540

Introduction

Project Overview and Motivation



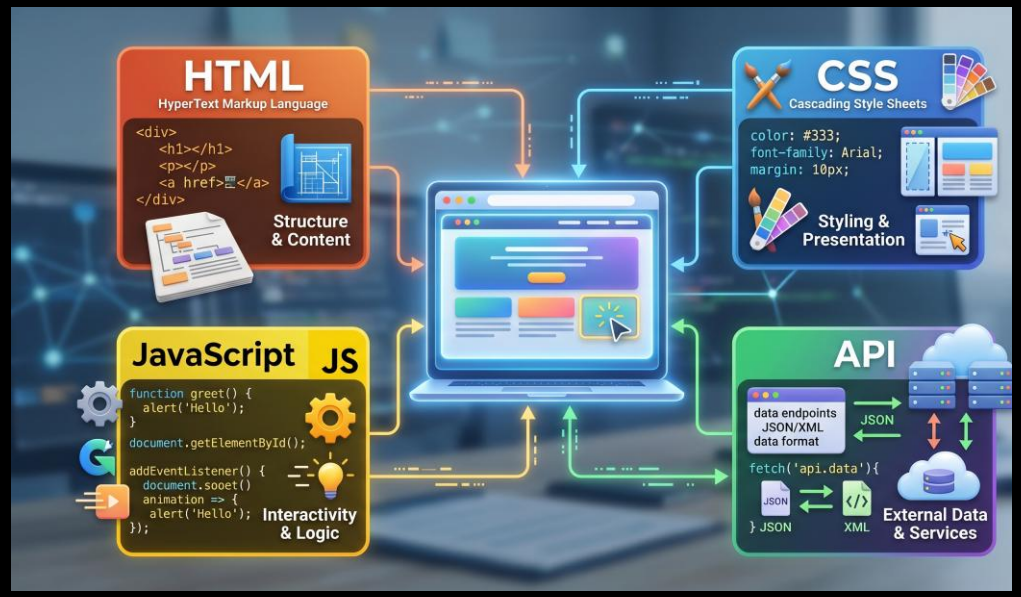
- Project Goal

  Establish a professional personal portfolio website to effectively showcase web development skills and deliver a responsive, interactive
  user experience.

- Motivation

  Undertake a real-world project beyond basic static pages to enhance UI/UX design abilities and refine practical front-end development techniques.

Technologies Used



- HTML5

  For structuring the web content.
  content.

- CSS3

  For styling and visual presentation.

- JavaScript (Vanilla JS)

  For interactive features and dynamic content.

- Local Storage

  For client-side data

- OpenWeatherMap API

  To fetch real-time weather data.
  data.

- GitHub Pages

  For simple and efficient deployment.

Key Features

- **Responsive Design**
  Ensures a seamless experience across desktop and mobile devices.
- **Dark/Light Mode Toggle**
  Allows users to select their preferred interface
- **Project Filtering System**
  Provides intuitive navigation and enhances content discovery.
- **Contact Form Validation**
  Guarantees that submissions are accurate and
- **Smooth Animations & Transitions**
  Improves user engagement and visual appeal through through
  fluid effects.
- **Personalized Greeting System**
  Creates a more tailored and engaging user

Innovation Feature: Weather Widget + Pixel Art

Core Functionality

Leverages user's precise location and integrates real-time weather data feeds.

Unique Visuals

Features custom-designed, animated pixel art icons with dynamic particle effects for rain and snow.

Reliability

Incorporates a fallback mode for API or location service failures.

Live Demonstration Agenda

We will showcase the following:

1. Homepage Layout

   An overview of the main interface and navigation.

2. Theme Toggle

   How users can switch between different visual themes.

3. Weather Widget

   Demonstration of the integrated weather information. information.

4. Filtering Projects

   Functionality for sorting and searching through projects.

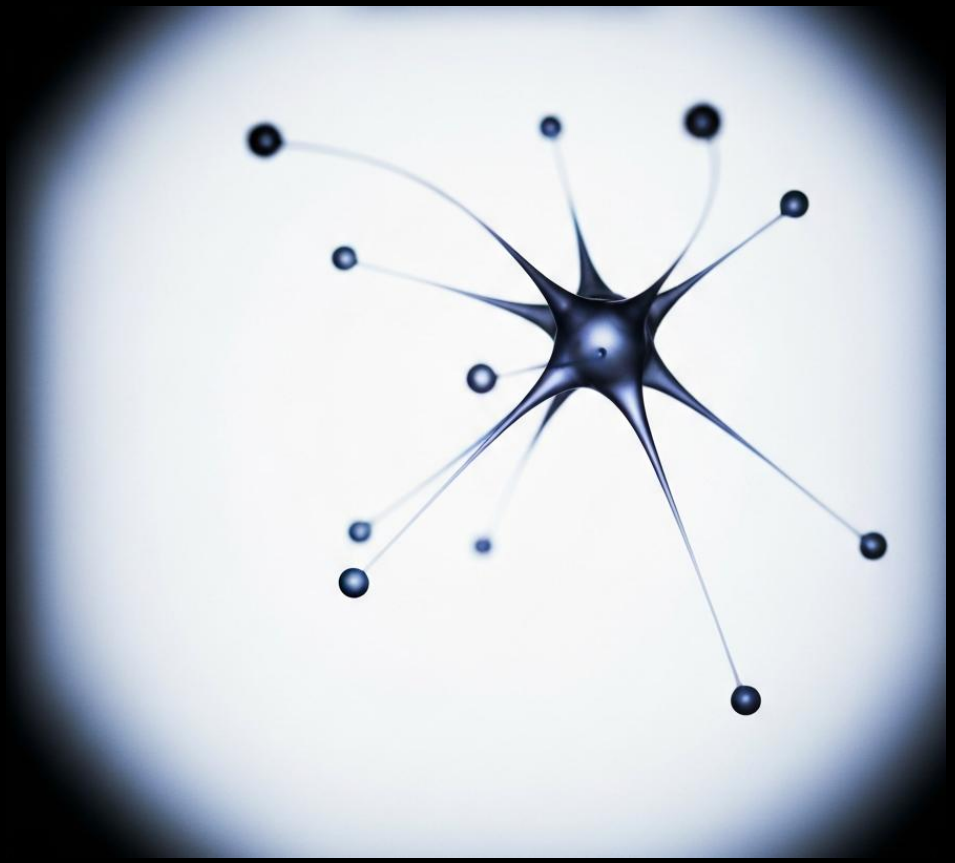
5. Contact Form Validation

   Real-time feedback and error checking for the contact form.

6. Responsive Design

   How the application adapts to different screen sizes and devices.

AI Integration



- **Tools Utilized**

  ChatGPT, Google Antigravity

- **AI Assistance Provided**

  Debugging, UI suggestions, JavaScript logic explanations, ideas, and code refinement.

- **Responsible Use Practices**

  Thorough review of AI outputs, manual code integration, and selective selective
  implementation of AI solutions.

Ensuring responsible and manual oversight of all AI-generated contributions is key to effective integration.

Challenges & Solutions

- Resolved Issues
- Layout shifting on hover

  Addressed and fixed layout shifts that occurred when hovering over elements.

- API delays / loading fallback

  Implemented fallback mechanisms to handle API delays and improve loading experiences.

- Mobile responsiveness issues

  Resolved problems related to content display and interaction on various mobile devices.

- Future Work
- Backend database

  Plan to integrate a backend database for enhanced data management.

- Store form submissions

  Develop functionality to store submitted form data.

- User accounts

  Implement a user account system system for personalized experiences. experiences.

- More projects section

  Expand the platform with an additional section for showcasing more projects.

Lessons Learned

Improved CSS Layout Skills

Gained a deeper understanding and practical ability in structuring web page layouts using CSS.

Enhanced JavaScript DOM Manipulation

Developed greater proficiency in controlling and interacting with the Document Object Model using JavaScript.

API Integration Experience

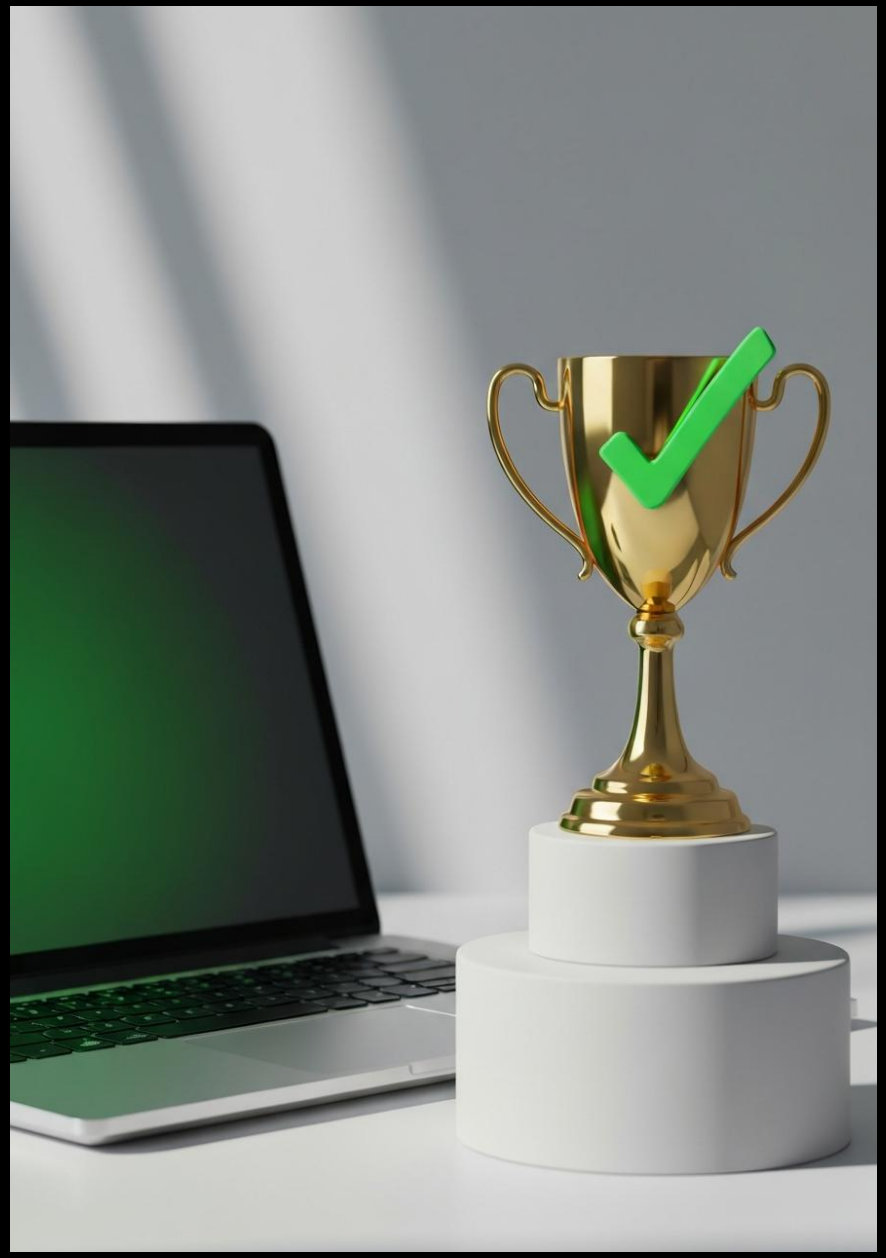
Acquired practical experience in connecting to and utilizing Application Programming Interfaces (APIs).

Real Project Deployment

Understood and executed the process involved in deploying a project in a real-world environment.

Value of Testing and Polishing

Recognized the critical importance of thorough testing and refinement for project quality.



Key Outcomes

Conclusion

Completed polished portfolio website

Combined all course concepts in one project

Improved technical confidence
